UNION PETROCHEMICAL PUBLIC COMPANY LIMITED

Sustainable Product, Customer Responsibility & Circular Economy Policy

1. Principles and Commitment

Union Petrochemical Public Company Limited (the "Company") is committed to conducting its chemical import, distribution and service businesses responsibly, taking into consideration quality, safety, customer needs, efficient resource utilization, environmental impact reduction and risk management throughout the value chain.

The Company applies the principles of the Circular Economy, Green Chemistry and Responsible Business to its operations, with the aim of creating economic value alongside responsibility towards the environment, society, customers, business partners and stakeholders.

This Policy is aligned with the Company's vision of becoming a leader in the comprehensive and responsible distribution of chemical products, serving customers' value chains across industries, and developing partnerships that maximize resource efficiency while conducting business in accordance with economic, social and environmental principles.

2. Scope of the Policy

This Policy covers the Company's operations relating to:

1. Product sourcing and selection
2. Importation and supply chain management
3. Storage and warehouse management
4. Transportation and product delivery
5. Provision of product information and customer services
6. Packaging and material management
7. Resource reuse and recycling management
8. Customer complaint management and customer satisfaction
9. Customer data protection and cybersecurity
10. Risk management and business continuity

3. Policy Guidelines

3.1 Sustainable Product & Green Chemistry

The Company promotes the selection and development of products that respond to Green Chemistry and Sustainable Product trends, taking into account product quality, safety, efficiency in use and environmental impacts throughout the product life cycle.

The Company supports products that contribute to reducing resource consumption and waste, or encourage the appropriate reuse of chemicals.

3.2 Circular Economy & Resource Efficiency

The Company promotes the application of the 3Rs—Reduce, Reuse and Recycle—in its operations by:

- Reducing unnecessary consumption of resources and materials.
- Promoting the reuse of suitable packaging and containers.
- Encouraging material segregation and recycling.
- Supporting the reuse or recycling of solvents where appropriate.
- Considering the feasibility of developing a circular system for packaging.

Any reuse or recycling activities shall take into account safety, product quality, applicable laws and chemical management requirements as key considerations.

3.3 Sustainable Packaging

The Company seeks to reduce the environmental impacts of packaging by considering:

- Reducing unnecessary materials.
- Using packaging that can be appropriately reused.
- Reusing drums, intermediate bulk containers (IBCs) or other containers in accordance with safety requirements.
- Segregating and directing materials into recycling processes.
- Selecting suitable alternative materials without compromising product quality or safety.

3.4 Customer Responsibility

The Company is committed to building customer trust and satisfaction through the following principles:

- Delivering products that meet specified quality requirements.
- Delivering products safely and in accordance with agreed terms.
- Providing accurate, complete and verifiable product information.
- Preparing Safety Data Sheets (SDS), labels, Certificates of Analysis (COA) and specifications, as appropriate.
- Providing information on product safety and use.
- Providing prompt and professional services.
- Receiving customer comments and complaints.
- Using customer feedback to continuously improve products and services.

3.5 Fair Marketing & Transparent Communication

The Company shall conduct marketing activities and customer communications fairly by:

- Not providing false or misleading information.
- Not making product performance claims beyond what can be substantiated.
- Clearly communicating sales and delivery conditions.
- Treating customers equally and fairly.

3.6 Customer Complaint Management

The Company shall establish a systematic process for receiving and managing customer complaints, including complaint receipt, root-cause analysis, corrective action, prevention of recurrence, follow-up and reporting to management.

The Company shall establish Service Level Agreements (SLAs) for responding to and closing complaints according to the severity of the issues.

3.7 Customer Data Protection & Cyber Security

The Company recognizes the importance of protecting customers' personal data and business information. It shall comply with relevant laws and implement appropriate measures to control access, storage, use and disclosure of information.

The Company promotes Cyber/Data Security measures to prevent data loss, unauthorized access, disclosure or use of information.

3.8 Sustainable Supply Chain & Business Continuity

The Company is committed to managing risks throughout the supply chain by monitoring key factors, including:

- Volatility in raw material and chemical prices.
- Geopolitical conditions.
- Exchange rates.
- Transportation and logistics disruptions.
- Supply disruptions.
- Natural disasters and emergencies.
- Cybersecurity.

The Company shall develop appropriate measures for inventory reserves, alternative sourcing and transportation systems, and shall prepare and review its Business Continuity Plan (BCP) to ensure continuity of customer service.

In the event of industrial warehouse fires in the Laem Chabang area in 2025, the Company's stated approach includes increasing confidence in customer services within the Eastern Economic Corridor (EEC), reducing transportation distances, energy consumption and greenhouse gas emissions.

4. Governance and Implementation

Management and relevant departments are responsible for implementing this Policy by:

- Assigning persons responsible for each area.
- Establishing key performance indicators (KPIs) and targets.
- Monitoring implementation performance.
- Assessing risks.
- Reviewing the effectiveness of the Policy at least once a year.
- Reporting results to management or the relevant committee, as appropriate.

Employees at all levels shall comply with this Policy and support sustainability initiatives within their respective responsibilities.

5. Long-Term Goals

The Company aims to continuously develop product sustainability, customer responsibility and circular economy management as integral parts of its business operations, guided by the following key objective.
